(4 marks)

**Notes:**

**M1:** Complete method to give equation in  $t$  only. This mark is for a complete method for the TOTAL time i.e. for finding sufficient equations, with usual rules, correct no. of terms in each equation but condone sign errors and  $g$  does not need to be substituted

**A1:** A correct equation or correct equations (e.g. if they find the speed,  $11 \text{ ms}^{-1}$ , when the ball strikes the ground and then use that to find the total time or if they split the time (e.g. 0.9s up and 1.1s down or 0.9s + 0.9s + 0.2s))

N.B.  $g = 10$  must be substituted in all equations used.

**DM1:** Dependent on first M1, for solving a 3 term quadratic to find  $T$  or for solving their equations to find  $T$  or for solving their equations and adding their split times to find  $T$

**A1:**  $T = 2$  only (i.e. A0 if they give two times)

N.B. If solving a correct quadratic, the DM1 can be implied by a correct answer i.e. the method does not need to be shown, but if there is no method shown and the answer is wrong then award DM0 A0.

	A1	Correct expression (s) <b>N.B.</b> If using an 'up and down method', this mark is for <b>all</b> the intermediate values: Distance up = 78.4, Time up = 4, time down = 6, distance down = 176.4 <b>AND</b> combining correctly i.e. (176.4 – 78.4) or (78.4 – 176.4) These are the values for $g = 9.8$

b	M1	Complete method to find half the time or the full time. Allow inequalities. e.g. for half the time, they may find $t = 4$ and $t = 1.5$ and subtract e.g. for the full time, they may find $t = 6.5$ and $t = 1.5$ and subtract
	A1	Correct equation or equations if they are using more than one.

c	B1	e.g. (use) a more accurate value of $g$ , (include) spin of the stone, (include) shape of the stone, (include) size of the stone, (include) wind effects, rotation B0 if any incorrect extras are included e.g. the mass or weight of the stone <b>DO NOT ALLOW NEGATIVES OF THESE</b> e.g there is no air resistance
